Subsector A02: CLEANING SERVICES

Subsector :	A02	Registration Date :	2021-07-02
Organization :	EVS		
Country :	Estonia		
Project ID :	00113799/0001	Project Established	
ICS :	11.020		
National Ref :	prEVS 944		
Title :	Requirements for cleaning in health care institutions		
Scope :	This standard describes the requirements for cleaning of areas in which infectious matter is likely to occur and thus cause direct and indirect transmission. Areas such as ceiling, floor, Walls and fixtures which are not covered by the critical risk points are not included in this standard. The wiping up and disinfection, if required, after spillage and contamination with human biological material, such as blood, secretions and excretions, are dealt with in Annex B.

 National : New

** End of Subsector **

Subsector A99: UNDETERMINED

Subsector : A99 **Registration Date :** 2021-07-28
Organization : UNI
Country : Italy
Project ID : 01609663/0001 Project
Established
ICS : 03.080.20, 03.100.40
National Ref : UNI1609663
Title : Non-regulated professional activities - Project Manager - Requirements for knowledge, skills, autonomy and responsibility
Scope : This standard specifies requirements related to the professional activity of the Project Manager.
 These requirements are specified starting with the specific tasks and activities in terms of knowledge and skills.
Relatedness :
 National : REV/AMD UNI 11648:2016

Subsector : A99 **Registration Date :** 2021-07-28
Organization : UNI
Country : Italy
Project ID : 01609701/0001 Project
Established
ICS : 03.040, 11.020
National Ref : UNI1609701
Title : Veterinary Technician
Scope : This standard defines the requirements related to the professional activity of the Veterinary Technician. These requirements will be specified, starting from the tasks and activities and the identification of their contents, in terms of knowledge and skills, also in order to clearly identify the level of autonomy and responsibility, in coherence with the National Qualification Framework (QNF). These requirements will also be expressed in such a way as to facilitate and contribute to make homogeneous and transparent, as far as possible, the relevant conformity assessment processes.
Relatedness :
 National : REV/AMD UNI/PdR 45:2018

Subsector : A99 Registration Date : 2021-07-28
Organization : UNI
Country : Italy
Project ID : 01609801/0001 Project Established
ICS : 03.080.30, 03.120.20
National Ref : UNI1609801
Title : Real Estate Agent - Requirements of knowledge, skills, responsibility and autonomy of Real Estate Agents, supplementary to UNI EN 15733
Scope : UNI EN 15733 defines the requirements for the provision of the services of real estate agents, indicating in Article 6 the qualifications and skills of real estate agents. In consideration of the Law of 3 February 1989, n. 39 and subsequent amendments and additions, which governs the profession of real estate agent, these elements are represented generically. Therefore, with the drafting of a specific Italian standard, it is intended to achieve alignment with the EQF system and define the requirements of knowledge, skills, responsibility and autonomy required by the Guide CEN 14 standards and by the national reference model for the technical standards relating to the professions. In addition, the document aims to define the elements of conformity assessment for the purposes of UNI EN ISO/IEC 17024:2012 and to integrate it with the guide to ethical aspects.

Established
ICS :
National Ref : PNE 180201
Title : Formwork. General Design, performance requirements and verifications
Scope : This standard specifies performance requirements, design methods (structural and general) and verifications for formwork. The requirements indicated in it are applicable to the different types of formwork that are usually used in construction. Additionally, provisions are established for special rates. This standard does not apply to the specific requirements of those elements that can be incorporated into the formwork in its manufacturing or work phase and are established in other national or European standards. This standard is applicable to both formwork that are built at the place of employment (commonly known as: traditional formwork) and to those built in the factory (industrialized formwork), whether they are standardized modular formwork or standardized custom formwork, both: “modular” and “made to measure”, they can be assembled on site or pre-assembled in the workshop. This standard does not apply to metal props or falsework. The owner of the formwork can also act as supplier of the formwork and as installer of the formwork. The manufacturer of the formwork can also act as owner of the formwork.

Title :	Management of medicinal gases in the health field.		
Scope :	This standard establishes the requirements for the management medicinal gases in all its phases and the facilities involved, as well as the ancillary systems.		

The standard applies to public and private hospitals, clinics, as well as other health centers where medicinal gases are managed in some of their phases.
Home oxygen therapy is excluded from this standard.

 Title : Building acoustics - Installation of doors and windows and other façade components - Criteria for the optimization of sound insulation of the building façade from external noise
 Scope : This standard defines the criteria for the installation of façade components (clenching and its controlled mechanical ventilation and dumpster device) and provides guidance on sound insulation verification of the facade from external noise.
 The standard applies to existing buildings and new buildings subject to cases of airborne sound propagation.
 The standard also applies to interior doors and windows for separation between environments that require noise protection.
 Appendix A of the standard is a reference document for the application of Presidential Decree no. 459 of November 18, 1998 (art. 5) and Presidential Decree no. 142 of March 30, 2004 (art. 6 and 7), relating to provisions for the containment and prevention of noise pollution deriving from vehicular and rail traffic, by means of direct interventions on receivers.

National Ref : NEN 3656:2021 Concept nl
Title : Requirements for submarine pipeline systems in steel
Scope : NEN 3656 gives minimal requirements for the design, construction, use, management and taking out of order of piping systems for the transportation of materials at sea. The scope of this standard applies to piping systems of Group I for the transportation of hazardous materials.

Title :	Intermodal loading units and commercial vehicles - Transport stability of packages - Minimum requirements and tests		
Scope :	<p>The transport stability of packages is a vital part of transport safety and the possibility of securing the cargo on different types of Cargo Transport Units (CTUs). This document specifies the requirements for marking and different methods for testing the transport stability of packages. A package means the complete product, consisting of the packaging and its contents prepared for packing into the CTU. The transport stability of the packages is divided to different levels depending on the capability to withstand the forces during the transport. The transport stability of packages requires different types of CTUs and/or securing methods to obtain safe cargo securing during the entire transport. Due to the different transport stability of the packages and different types of CTUs, additional securing of the cargo has to be determined in each specific case. Before the package is prepared for the transport it can be defined as a handling unit without any transport packaging material to obtain transport stability. The minimum requirement for the stability of the handling unit is set to obtain a safe handling both before and after the transport. The aim of the different test methods is to define the Transport Stability Level (TSL) of a package or handling unit.</p>
