Sector A : SERVICES

Register issued on : 2017-11-06

Subsector A04: TRANSPORTATION SERVICES

Subsector : A04 **Registration Date :** 2017-10-18
Organization : IPQ **Draft Issue Date :** 2017-10-16
Country : Portugal **Latest Date for Comments :** 2017-11-16
Project ID : C1481701/0001 **Draft for public enquiry**
ICS : 03.120, 03.220
National Ref : prNP 4558
Title : Car parks. Interface with public passenger transport. Characteristics and service provision
Scope : The purpose of this standard is to specify the minimum qualitative and quantitative characteristics and requirements as well as the quality requirements for the provision of a car park service with an interface to public passenger transport. It applies to all entities whose activity is the provision of service of car parks integrated with other modes of transport.

Subsector : B04 **Registration Date :** 2017-10-18
Organization : ISRM
Country : Former Yugoslav Republic of Macedonia
Project ID : 00059232/0001 **Project Established**
ICS : 75.140, 91.100.50
National Ref : H MKC 1018:2017
Title : Bitumen and bituminous binders – Aniononic bituminous emulsions for roads
Scope : This standard determines the quality requirements for anionic bitumen emulsions (alkaline bitumen emulsions), which are used as a tack coat between the asphalt layers in road pavements (using mineral materials with carbonate composition, respectively with sedimentary origin) .

Relatedness :

National : New

Subsector : B04 **Registration Date :** 2017-10-30
Organization : UNI
Country : Italy
Project ID : 01603597/0001 **Project Established**
ICS : 91.100.10
National Ref : UNI1603597
Title : Cements resistant to alkali-silica reaction
Scope : The standard is to define the content values of alkali equivalents ($\text{Na}_2\text{O}_{\text{eq}} = \text{Na}_2\text{O} + 0.64 * \text{K}_2\text{O}$) for common cement so that the cements can be used as inhibitors for the expansive

reaction that some aggregates, containing particular forms of silica / silicates, may occur. The phenomenon is known as alkalisilica reaction (ASR).

Subsector : B08 Registration Date : 2017-10-06
Organization : UNE
Country : Spain Latest Date for Comments : 2017-11-15 Draft for public enquiry
Project ID : P0048901/0001
ICS :
National Ref : PNE 85160
Title : Security doors and hardware. Minimum requirements related to protection and resistance class. Selection, application and installation criteria.
Scope : This standard specifies the criteria for selection, application and installation of burglar resistance security doors from security level 3, specified in UNE-EN 1627:2011.

It applies to the door, including frame, sash(es), hardware (turning elements, lock, cylinder and security rosette) and installation.

This standard provides a classification of security doors depending on additional parameters to burglary resistance: clean attack protection (without using physical force), access control, access and attack detection, proper installation and documentary control.

The standard also defines test methods which consider the use of new tools for manual attack and documentary evidence to improve the protection of the lock device against skill

attacks, such as bumping, key copying or fast pick locking. These additional parameters are broken down into different levels of protection.

The standard includes the physical adjustments to incorporate sensors that can be connected to intrusion alarm electronic systems and it gives maintenance recommendations for security doors.

This standard does not apply to strongroom doors and strongrooms included in the scope of EN 1143-1.

National Ref : ÖNORM H 7701 Beiblatt 1

Title : Thermal Solar Systems - Supplement 1: General characteristics for the calculation of passive solar installations and for flat collectors in domestic hot water systems

Scope : This ÖNORM contains an approximation procedure for the calculation of the collector surface area of flat collectors in thermal solar systems for hot water production. The simplified assessment procedure of this ÖNORM can be applied to systems with the following boundary conditions:

- Plants with a gross collector area up to 20 m²
- Plants which are mainly used for water heating
- Plants without significant south-weakening of the orientation of the collectors

Annex 1 contains those general and geographical characteristics necessary for the calculation in accordance with ÖNORM H 7701.
